

Facilities + Properties

Manage + Maintain Your Assets with Simplicity + Power

ManagerPlus enables facility and property managers to better perform preventative maintenance tasks and more efficiently dispatch work orders. It is ideal for those tracking a myriad of systems and equipment, such as: HVAC, lighting, security, fire detection and suppression systems, elevators, and more.

ManagerPlus will transform the way you maintain your facility by improving operational efficiencies, reducing costs and shifting resources away from paper-based systems. Powerful preventative maintenance combined with work order and inventory management delivers robust functionality. With ManagerPlus, you can quickly and easily schedule and review recurring maintenance tasks while reducing the time needed to administer service requests. It formulates work orders for your onsite maintenance staff or preferred building service vendors or suppliers. Plus, you can generate reports on work order history and preventative maintenance schedules on buildings and equipment.

Our customers include manufacturing plants, hotels, hospitals, universities, municipalities, and more. ManagerPlus empowers maintenance supervisors and property managers with comprehensive data on all of their assets and processes.

- + Scheduling
- + Work Orders
- + Sub Assets
- + Depreciation
- + Purchase Orders
- + Repair Histories
- + Tool Tracking
- + Parts Inventory
- + Warranty Tracking

“The Qquest ManagerPlus software is the tool our school district needed to meet and exceed State Statute requirements of a work order based tracking and reporting system for all building maintenance. The on-site training and system design assistance we received from Qquest was outstanding. We saved a great deal of staff time by utilizing the technician’s knowledge of the ManagerPlus software to set up our basic building information and recurring work orders. All of our staff benefited from the hands on training and continue to use the ManagerPlus Software with confidence and skill. Our Facilities Director uses the reporting features not only to manage the day-to-day maintenance activities; he finds the reports useful for Board meeting presentations and planning purposes as well.”

— Laura Hylton,
Business Manager,
Lake and Peninsula School District
