

Fleet + Transportation

Manage + Maintain Your **Fleet** with Simplicity + Power

ManagerPlus effortlessly handles an unlimited number of preventative maintenance schedules for all of the vehicles in your fleet and their subsystems (engines, tires, hydraulics, etc). Easy to use, and quick to learn, our software system ensures that the system you pay for will actually get used.

Detect early signs of equipment and vehicle fatigue. ManagerPlus monitors performance based on fuel and/or oil consumption. Fuel per mile/hour and oil per mile/hour reports help you spot potential problems before they become serious headaches.

In addition, ManagerPlus automatically creates work orders when preventative maintenance is due and documents your activities, making it easier to analyze trends and spot recurrent problems. Monitor maintenance by odometer, hours, days, calendar dates, days of the week, or tire depth.

And while we've made certain the software is very easy to implement, adopt, and maintain—we've not sacrificed capability. The software is powerful and feature-rich, including:

- + Scheduling
- + Fuel/Oil Tracking
- + Work Orders
- + Sub Assets
- + Depreciation
- + Purchase Orders
- + Repair Histories
- + Tool Tracking
- + Tire Tracking
- + Parts Inventory
- + Warranty Tracking
- + Fuel Tracking Import

"ManagerPlus helps us keep up with our inventory. We have over 10,000 parts and it helps keep track of them. All you need to do is take off the parts that you use and it tells you what you need to reorder and the cost. It helps us keep track of when the vehicles need oil changes. How much fuel is used. We have around 30 in our fleet of buses. It makes it quick and easy to track each one."

— LeRoy Nye,
Five Season Transportation

"The ManagerPlus software works great. We have used it since 1997 to track and schedule all of our motor coach and school bus maintenance. It was very easy to learn and setup for our needs. We can track all of our maintenance costs very easily. We have also been able to streamline our parts inventory and track what we use. The software is the best value on the market."

— Greg Lammers,
Fleet Manager,
Owatonna Bus Company
