Smart Hotel Software Hospitality Solutions

Do you have to re-key data from one system to another and spend time reconciling the differences?

Do you have to upload and download data between systems?

Are you maintaining the same or very similar data in multiple databases?

Do you wish that everything was tied together?

Are you worried about your credit card security?

Is it difficult to market to your existing guests?

If you answered **"YES"** to any of these questions, Smart Hotel Software can help.

Today a modern competitive hospitality property needs a fully integrated software system. Focus on guest services instead of your computer. Save time and money with improved efficiencies. Increase revenue with yield management. Improve guest service with extensive customizable guest history.

Property Management System (PMS)
Reservations, check ins, check outs, guest folios, split folios, corporate accounts, group bookings, maintenance, housekeeping, integration to phones and video, sales/forecast/audit reports, 24x7 support

Point of Sale (POS)
Modern, easy to use, touch screen POS using your own hardware. Suitable for bars, restaurants and shops. Table service or retail. Direct connection to PMS and accounting. 24x7 support

Accounting
Get the power and ease of use of industry standard Accounting Software without the integration nightmares.

Banquet & Event Orders (BEO)
Quotes, contracts, detail by time of day, BEO, invoice. Booking of meeting space, layouts, table & chair setup, catering, AV, optional guest room block.
